Çengel ağız ile daha güvenilir tutuş sağlar.
Ağız geniş açılabilir.
Düzgün ve uygun kesme sağlar.
Deforme olmamış ezilmemiş parça alınmasına imkan verir.
Travma'ya neden olmaması nedeni ile iyileşme çabuk olur.
More reliable grip on the tissue due to 'hooking' effect.
Wide angle of opening.
Smooth, steady cut.
Specimens are not squashed.
Not painful; self-wound, heals well.

Function:

The vacuum required can be constantly preset by the adjusting screw. This vacuum exists then up to the closed quick-shutter, thus the vacuum in the suction head is pressed from the left to the right, the nounted suction head is immediately put under the preset vacuum. In case the preset vacuum has to be changed, this can be done with the adjusting screw. For immediate removal of the suction head simply close the quick-shutter, thus the vacuum in the suction head is eliminated at once whereas the vacuum in the suction jar remains unchanged.
